Part III

Implementation

Section A

Introduction

This Chapter summarizes the tasks that must be performed as a condition of approval of Otay Ranch SPAs. The source of the listed requirements is Part I and Part II of the GDP/SRP. The listing is presented to assist the public and governing agencies to more completely understand the various SPA processing requirements. This Chapter neither establishes new or different requirements from those identified in the GDP/SRP, nor alters the obligation to perform requirements contained in the GDP/SRP.

The implementation requirements are organized into four categories:

- ☐ Project-wide Tasks
- ☐ SPA Tasks
- ☐ Annual Tasks
- ☐ SPA Specific Tasks

The project-wide tasks include those to be performed as a condition of the first Otay Ranch SPA, regardless of which village or planning area is the subject of the first application. SPA tasks must be performed as a condition of each Otay Ranch SPA. Annual tasks must be performed annually, regardless of which SPA is being processed. Primarily, major tasks are listed. Other tasks, subordinate to the major tasks must also be performed. Specific SPAs tasks must be performed in connection with SPAs, which contain specific villages or planning areas.
